Fraunhofer USA - Laser Applications Division, Plymouth, MI

Who we are?

Fraunhofer is Europe's largest application-oriented research organization with locations throughout the world. Our Plymouth Michigan facility is responsible for contract research and development, process development, prototyping, consulting and technical support. We have extensive expertise in laser welding, laser cladding, laser heat treatment and a state-of-the-art laser facility.

We offer internships for students in the field of Laser Materials Processing

Information

- Minimum duration of U.S. stay is 6 months (Max 12 months)
- Knowledge / education in laser technology is required
- Sufficient English language skills are required
